24 September 2007

To whom it may concern,

For the period of May to September 2007 Ben Dennis provided supervision of the refurbishment of No.5 Blast Furnace Cooling Tower at BlueScope Steel's Port Kembla Steelworks.

During this period work progressed on a 10 hours per day, 6 days per week basis with a total of over 8,000 hours being worked. There were zero injuries and zero environmental incidents on this project and the last cell was commissioned on time.

The quality of Ben's supervision is reflected in this outstanding safety performance and successful project completion.

A handwritten signature in blue ink that reads "Peter Roberts".

Yours faithfully

Peter Roberts
